

Document Purpose

DCC Boxed product emulates the DCC, smart metering network in a self-contained environment, without impacting or connecting to the live environment.

This document describes the known issues and limitations and corresponding solutions or workarounds for version 23.11.1 Stable Release of the DCC Boxed product.

Warning: The user is strongly advised to review these known issues thoroughly before performing any update as existing information or functionality may be disrupted after performing the update.

For technical support please contact the DCC Boxed Support Team: dccboxed@smartdcc.co.uk
