Devices for Testing

Results of Process to select Devices for use in Systems Integration Testing

Version 1.0
Date 30/06/2015

This list contains the meters that have been selected for use in DCC testing in SIT, listed in alphabetical order. This selection was undertaken in accordance with the Device Selection Methodology, and testing was carried out on these devices to determine that they will be suitable for the purposes of testing against the DCC. These Devices will be placed on an "Equipment under Test List" for use by the DCC.

Meter Type	Manufacturer	Model	Variant
ESME	Elster	AS302P	N/A
ESME	Holley	AES110B	N/A
ESME	Holley	AES1220	N/A
ESME	Kaifa	MA120B	N/A
ESME	Kaifa	MA120	N/A
ESME	Landis+Gyr	E470	SMETS2
GSME	Elster	BK-G4E	SMETS2
GSME	Holley	JGD4S-R	N/A
GSME	Landis+Gyr	G470	SMETS2
