Subject: DCC Notice: - Invitation to comment on Communications Hub Orders Policy

Please see below npower's response to the above consultation

Question 1: is the DCC Communications Hub Orders Policy described with sufficient accuracy and clarity?

npower response – Yes apart from the points below we believe that the DCC Communications Hub Orders Policy has sufficient accuracy and clarity.

1. Section 1.1 Definitions – “DCC Aggregate Order Quantity means the aggregated order quantity of all Party Communications Hub Orders applicable to a particular Delivery Month and Region.” Whilst **Delivery Month** and **Region** are defined terms in the SEC (so capitalisation is correct), **Party Communications Hub Orders** is not a defined term in the SEC so capitalisation either needs to be removed, or new SEC Defined term created.
2. In the Worked Examples – Could the worked examples display the variance? just be shown in brackets or similar?

Question 2: is the DCC Communications Hub Orders Policy unduly discriminatory or disproportionate?

npower response – No, we don't believe that the DCC Communications Hub Orders Policy is unduly discriminatory or disproportionate.

Regards
