

SMETS1 Supporting Requirements (S1SR) – Release Note

**Version 0013: Release Note
13 February 2019**

Release Note

This release note accompanies, but does not form part of, SMETS1 Supporting Requirements 0013 (S1SR) It lists the principal changes and updates to S1SR.

Summary of main changes

SECTION	Section Heading	Specific Change Point
2	Defined Terms	Added terms imported from the text consulted on along with SRPD v1.2a
13.1	Configuration pre-requisites for operating a SMETS1 Device through the DCC	Added a clarification of the circumstances in which configuration pre-requisites should be met
17.39	Retrieve Device Security Credentials (KRP) (SRV 6.24.1)	Corrected cross reference
17.42	Request Handover Of DCC Controlled Device (SRV 6.21)	Added clarification on the expected content of a SMETS1 Response to SRV 6.21
18.5 (j) and (k)	18.5 Update Prepayment Configuration (SRV 2.1)	Corrected description of S1SP action when SRV 2.1 is submitted with wildcards and the target Device does not support wildcards.
18.7 (h)	Update Debt (SRV 2.3)	Added new device specific behaviour from DIRF, relating to truncation of millipence values to centipence
21	Time	Added requirement for S1SP to maintain time on Devices, via the DCO
22	Anomaly Detection	Imported from text consulted on along with SRPD 1.2a, now concluded
It should further be noted that for other releases (MOC, FOC) additional Device Specific Behaviours may need to be added to S1SR.
