1. Introduction and Context

The detailed technical and procedural requirements for migration are set out in the Transition and Migration Approach Document (TMAD).

On 14 February 2019, BEIS designated TMAD into the Smart Energy Code (SEC) using the powers that are set out in Section X of the SEC. TMAD requires that DCC develop and consult on four 'child' documents (which provide further operational and technical details) as follows:

- Migration Scaling Methodology;
- Migration Authorisation Mechanism;
- Migration Reporting Regime; and
- Migration Error Handling and Retry Strategy.

Clauses 4.45 and 4.46 of the TMAD covers the arrangements for initial development and subsequent change of the Migration Reporting Regime (MRR).

The current version of the MRR was effective from 29 September 2020 and is available via <https://www.smartdcc.co.uk/document-centre/tmad-child-documents/migration-reporting-regime-mrr/>. This document considers responses of the consultation¹ and summarises consequential changes that have been made to the MRR.

This new version v5.0 of the MRR is now published to be effective from 16 December 2020.

2. Stakeholder Engagement

This section details the DCC's stakeholder engagement that has taken place in relation to revision of the Migration Reporting Regime.

On 3 November 2020, DCC published the consultation document titled '[SMETS1 – Further Changes to the Migration Reporting Regime \(v4.1\) – Consultation Document](#)' on the DCC Website and DCC's Service Desk also emailed stakeholders to notify them of its publication.

The scope of the consultation covered the following matters:

- [Migration Reporting Regime V4.1 \(delta against V4.0\)](#)

Stakeholders were invited to respond by 16:00 on Tuesday 1 December 2020 using a response template that was provided as part of the consultation.

3. Consultation Questions

The [SMETS1 – Further Changes to the Migration Reporting Regime \(v4.1\) - Response Template](#) presented the following question covering the consultation as presented in Table 1.

¹ <https://www.smartdcc.co.uk/customer-hub/consultations/consultation-on-further-changes-to-the-migration-reporting-regime-mrr-v41/>

Number	Question
MRR v4.1 Q1	Do you have any comments on changes to the MRR within the scope of this consultation?

Table 1 - SMETS1 MRR v4.1 Consultation Question

4. Analysis of Responses

During the consultation period, DCC received three responses to the consultation providing feedback on changes recommended in the MRR.

DCC has analysed the feedback provided and views of stakeholders. Subject matter experts within DCC have reviewed every response.

DCC sought views on proposed changes to the MRR asking **“Do you have any comments on changes to the MRR within the scope of this consultation?”**

Two respondents supported the changes to the MRR.

One respondent responded to the consultation noting they had no comments on the changes to the MRR.

One respondent welcomed the alignment of S1MIG-002 and S1MIG-006 and noted that it reduced their resource requirements.

DCC notes that there were no areas of disagreement.

5. Summary of Drafting Changes

Having considered the consultation responses and having further reviewed the MRR, DCC is of the view that no further changes are required to be made to the MRR following the consultation process.

It is important to note that sample files are also unchanged and remain as V3.0 and are available from DCC’s website as [SMETS1 Migration Reporting Regime - sample files - V3.0 \(unchanged\)](#).

6. Conclusion and Next Steps

DCC is confident that the MRR meets the requirements set out in Clause 4.45 (a) of the TMAD and is fit for purpose.

DCC is of the view that it has met its obligations set out in Clause 4.45 (a) of the TMAD having consulted in line with this Clause. DCC has, where necessary, addressed the comments that have been received from industry and there are no material disputes that have not been resolved.

The MRR is in line with the overall solution design for the SMETS1 Service and other relevant documents.

DCC considers that the MRR is defined to a sufficient level of detail to meet the requirements of Clause 4.45 of the TMAD.

It is DCC's view that the documents deliver the requirements specified in Clause 4.45 (a) of the TMAD, is materially complete, and the content is technically accurate.

Consistent with Clause 4.46 of the TMAD, within one month of the publication of the MRR and provision of copies of the document to the Panel, the Parties, the Authority and the Secretary of State, any Supplier Party may refer the MRR to the Secretary of State, which should be sent to the following email address: Smets1_appeals@beis.gov.uk.

7. Attachments

Table 2 details the attachments to this conclusions document.

Number	Attachment
